Key Strengths

01

Network Monitoring

OuiCroissant's
Network Monitoring
was very quick to react
and notify about
anomalies.

02

Fixed Vulnerabilities

42% of vulnerabilities
were remediated upon
re-assessment.

Short-Term Recommendations

01

Update Hosts

Stronger passwords will significantly improve account security.

02

Stronger Password Policies

Address critical misconfigurations in the Active Directory environment.

03

Address Misconfigurations

Address critical and easy-to-address vulnerabilities in custom applications.

Long-Term Recommendations

01

Security Audits and Assessments

Regular testing reveals vulnerabilities and misconfigurations before they can be abused.

02

Regular Patching and Updates

Regularly adopt the newest versions of software on a regular, systematic basis.

03

Employee Awareness and Training

Training and awareness programs will greatly help prevent social engineering.
